Achievements

Member of Forbes BLK

5x Best Programmer of the Year of Nnamdi Azikiwe

Univeristy

Foya Africa Techprenuer of the Year Finalist

2x Best Programmer of the Year (Google Student Developer Club End of

Session Awards)

5x Hackathon Winner

Selected as Student Campus Ambassador for Google 2024/2025 (GDSC Program) in my University

Got My Startup (Learnrithm Ai) backed by Two Top VC(Venture Capitalist) Firms which are Superchargers Ventures and Plug-in Ventures

Served as the President Of National Association of Statistics Students

Served as the Student Union Government(SUG) Director Of ICT OF Nnamdi Azikiwe University

PROJECTS I HAVE WORKED ON

Learnrithm AI- Learnrithm AI is an EdTech platform that helps users learn any subject or skill through an AI teacher and quiz features. It provides personalized lessons with videos, images, and PDFs, plus quizzes for exam prep.

WORK EXPERIENCE

Learnrithm Ai

CEO AND FOUNDER

FEBRUARY 2024 – Present

As the CEO and Technical Founder of Learnrithm AI backed by Supercharger Ventures and Plug-in Ventures, I was instrumental in both the technical development and strategic leadership of the company. -My dual role allowed me to effectively bridge the gap between innovative technology and business strategy, ensuring the platform met the needs of our users while achieving our organizational goals.

My Responsibility:

- Platform Development:** Led the architecture and development of the Learnrithm AI platform, utilizing modern technologies such as AI algorithms, React.js, and Next.js. Oversaw the implementation of key features, including personalized learning pathways and interactive quizzes.
- AI Integration:** Spearheaded the integration of AI capabilities into the platform, enabling the AI Teacher to adapt to individual learning styles and provide tailored educational content. Ensured the AI system was robust and responsive, enhancing the overall user experience.

3. **User Experience Optimization:** Focused on creating a seamless user interface (UI) and user experience (UX) by conducting usability testing and gathering user feedback. Implemented iterative improvements based on insights to enhance engagement and satisfaction.
4. **Technology Roadmap:** Developed a technology roadmap outlining future enhancements and feature releases, aligning technical objectives with business goals. Ensured timely delivery of updates and new functionalities.
5. **Team Building and Management:** Recruited, trained, and managed a diverse team of technical and non-technical professionals. Fostered a collaborative and innovative work environment, encouraging team members to share ideas and take ownership of their projects.
6. **Stakeholder Engagement:** Actively engaged with stakeholders, including investors, educational institutions, and users, to gather insights and foster partnerships. Built strong relationships to support the company's growth and expansion.

APP TO MATCH UNITED STATES II REMOTE

Senior Software Engineer

August 2019 – September 2021

During my time at App to Match, I worked as a Software Engineer, focusing primarily on developing user interfaces with React.js, Next JS and TypeScript. My role involved collaborating with cross-functional teams to design and implement scalable and maintainable front-end solutions. I was responsible for building and optimizing web applications, ensuring a seamless user experience through efficient and clean code.

Key Responsibilities:

- - Developed and maintained web applications using React.js and TypeScript, ensuring high performance and responsiveness.
- - Collaborated with designers and backend developers to create cohesive and visually appealing user interfaces.
- - Implemented state management solutions using Redux and Context API to handle complex application states.

- - Conducted code reviews and provided constructive feedback to maintain code quality and best practices.
- - Utilized modern front-end development tools and frameworks, including Next.js, Tailwind CSS, and React Query.
- - Participated in agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, to ensure timely delivery of features.
- - Troubleshoot and resolved bugs, optimizing applications for maximum speed and scalability.
- - Wrote unit and integration tests using Jest and React Testing Library to ensure the reliability of the codebase.

This experience allowed me to deepen my expertise in front-end development, sharpen my problem-solving skills, and contribute to a dynamic and innovative team environment. My time at App to Matt was instrumental in honing my technical abilities and preparing me for future challenges in the tech industry.

Genesis Group

Nigeria || On-site

Senior Software Engineer

May 2024 – November 2024

As a Senior Software Engineer at Genesis Group, I played a vital role in the design, development, and implementation of innovative software solutions that supported the company's various business lines, including hospitality and food services. responsibilities included leading technical projects, collaborating with cross-functional teams, and ensuring the delivery of high-quality software products.

My Responsibility:

1. **Software Development:** Led the full software development lifecycle (SDLC), from requirements gathering and analysis to design, coding, testing, and deployment. Utilized modern technologies and frameworks, including Next.js and TypeScript, to build scalable and efficient applications.
2. **System Architecture:** Designed and implemented system architecture that improved performance and maintainability. Developed RESTful APIs to facilitate seamless communication between front-end and back-end systems.
3. **Collaboration with Teams:** Worked closely with product managers, designers, and other engineers to deliver user-centric software solutions. Engaged in regular code reviews and

collaborative problem-solving sessions to ensure best practices and maintain high code quality.

4. **Performance Optimization:** Analyzed application performance and implemented enhancements to improve load times and responsiveness. Conducted thorough testing and debugging to ensure reliability and performance.
5. **Documentation and Training:** Created comprehensive documentation for software systems, including design specifications, user guides, and technical manuals. Provided training and mentorship to junior developers, fostering a culture of learning and knowledge sharing.
6. **Project Management:** Led key software development projects, coordinating timelines, resources, and deliverables. Ensured projects were completed on time and met stakeholder expectations.
7. **Technical Leadership:** Acted as a technical leader within the engineering team, guiding architectural decisions and best practices. Advocated for the adoption of new technologies and tools to enhance the development process.
8. **Stakeholder Communication:** Engaged with stakeholders to understand business requirements and translate them into technical specifications. Communicated project status and technical challenges effectively to non-technical audiences.
9. **Innovation and Improvement:** Identified opportunities for process improvements and innovative solutions within the software development lifecycle. Contributed to strategic discussions on technology direction and product roadmaps.

WMN INDUSTRIES

United States|| Remote

Senior Software Engineer

September 2023 – January 2024

As a Software Engineer at WMN Industries, I was responsible for developing and maintaining software applications that improved operational efficiency and supported business processes across the organization. My role involved collaborating with cross-functional teams to deliver high-quality software solutions that met the needs of various stakeholders.

My Responsibility:

- ✓ **Application Development:** Designed, developed, and implemented software applications using programming languages such as Java, Python, and JavaScript. Ensured that applications were scalable, efficient, and aligned with user requirements.
- ✓ **Database Management:** Managed and optimized databases to ensure data integrity and accessibility. Developed queries and scripts to facilitate data retrieval and reporting for various business operations.
- ✓ **Software Testing:** Conducted thorough testing and debugging of applications to identify and resolve issues. Implemented automated testing frameworks to enhance the reliability and performance of software products.
- ✓ **User Interface Design:** Collaborated with UI/UX designers to create intuitive and user-friendly interfaces. Focused on delivering a seamless user experience by incorporating feedback and best practices into the design process.

- ✓ **Technical Documentation:** Created and maintained technical documentation for software applications, including design specifications, user manuals, and system architectures. Ensured documentation was clear and accessible to both technical and non-technical users.
- ✓ **Team Collaboration:** Worked closely with cross-functional teams, including project managers, product owners, and other developers, to ensure alignment on project goals and timelines. Fostered a collaborative environment that encouraged knowledge sharing and teamwork.
- ✓ **Mentorship:** Provided guidance and support to junior developers, assisting them in their professional growth and helping them navigate technical challenges. Encouraged best practices and a focus on quality in software development.
- ✓ **Project Participation:** Actively participated in project planning and requirement analysis meetings, contributing technical insights and recommendations to enhance project outcomes. Communicated progress and challenges effectively to stakeholders.
- ✓ **Continuous Improvement:** Identified opportunities for process enhancements and technology upgrades, advocating for best practices in software development and encouraging the adoption of modern development tools and methodologies.

Through my experience at WMN Industries, I contributed to the successful delivery of software solutions that streamlined operations and improved overall business performance. My technical skills and collaborative approach enabled me to effectively address challenges and deliver value to the organization.

ADDITIONAL

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, python
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js
- **Database Management:** MongoDB, MySQL, Prisma (ORM), Supabase
- **Tools & Platforms:** Koyeb, Vercel, Railway, AWS, Azure, Clerk (Authentication), Excel (Data Management), Git/GitHub
- **AI Development:** Chatbot creation, AI model integration, AI-driven SaaS platforms
- **Data Analysis:** MongoDB for analytics, advanced Excel techniques
- **Mobile & Web Development:** End-to-end app development, responsive design, API integration
- **Version Control:** Git/GitHub for collaboration and project management
- **Other Skills:** E-commerce systems, EdTech solutions, and content delivery platforms
